SINOYOLO CALATA

063 280 4432| sinoyolocalata@gmail.com| Pretoria, Gauteng

SUMMARY

Third-year Diploma in Information Technology student with an infrastructure foundation, specializing in security and database. Experience in designing enterprise networks, conducting vulnerability assessments and developing applications in c# and Python. Currently seeking a Work-Integrated Learning(WIL) internship to apply hands-on technical skills and deliver practical IT Solutions.

PROJECTS

Network Reconnaissance & Vulnerability Assessment

Configured isolated VirtualBox environments including a Kali Linux(Scanner) and Metasploitable2(Target) with static IPv4 addressing.
Executed and evaluated multiple Nmap scan types, -SYN Stealth (-sS), TCP Connect (-sT), UDP (-sU) and ACK (-sA), to map active services, open ports and firewall rule behaviors.
Analyzed protocol-level traffic (TCP handshakes, ICMP responses, RST flags) to assess target exposure and detection risks.

Denial-of-Service Simulation

Built an isolated internal virtual network(intnet) with static IP configurations to perform controlled stress testing.
Initiated a TCP SYN flood attack using hping3 –flood to evaluate target system degradation under heavy request loads.
Evaluated host health pre – and post- attack using ping response latency and netstat diagnostics, documenting dropped packets and high-volume segment resets.

Campus Enterprise Network Architecture & Design (Group Project)

Designed a hierarchical star network topology in Cisco Packet Tracer to support a branch campus featuring 3 classrooms (33 endpoints), central application servers and gateway.

Designed and configured a VLSM IPv4 scheme across 5 distinct VLAN's (Classroom, Server Farm, Management), implementing /27 and /28 subnets to optimize address space and isolate broadcast domain.

Configured central DHCP pools on a Cisco ISR router with excluded static address reservations for critical infrastructure, default gateways and static endpoint devices.

Specified enterprise hardware components including Cisco ISR 1100 routers, Catalyst 2960-L/3650 switches and Dell PowerEdge R450 servers, balancing cost, scalability, redundancy and security.

EDUCATION

National Senior Certificate
Strelitzia High School | January 2018 - December 2022

- Academic Record: Bachelors Pass

Diploma in Information Technology
Belgium Campus ITversity | February 2024 – Present

- Currently completing 3rd year of academic studies. Available for full-time Work-Integrated Learning (WIL) immediately.
- Current academic record: 12 Distinctions | 64.3 Weighted Average

SKILLS

- **Networking & Infrastructure** – Hierarchical Start Topology, Local Area Network(LAN), Inter-VLAN Routing, Subnetting and VLSM(/27,/28). TCP/IP Suite, DHCP Scope Configuration, Static IP Allocation, DNS, NAT, ARP, ICMP. Cisco Packet Tracer, Cisco ISR Routers, Cisco Catalyst Switches and Dell PowerEdge Servers.

- **Cybersecurity & Systems** – Nmap(SYN Stealth, TCP Connect, UDP, ACK Scans), Port Scanning and Service Mapping. DoS Simulation(hping3), Packet Analysis, Network Traffic Monitoring(netstat, ping latency analysis). Buffer Overflow Analysis, Privilege Escalation(Linux/Kali), Command Line Interface(CLI), Access Control Lists (ACLs), Kali Linux, VirtualBox.
- **Software Engineering & Database** – Python (Pandas, Matplotlib), c#. Class Structuring and Data Modeling, File Encryption/Decryption, Scripting and Automation. Database Design and Structured Data Handling.
- **Soft Skills** – Communication, Problem-Solving, Teamwork & Collaboration, Adaptability, Time management, Multi-tasking and Public Speaking

CERTIFICATES

- Master Class Certificate (Completion on Agentic Automation)
- Master Class Certificate (A Glimpse into ERP)
- Hack The Waste Hackathon 2025
